SUMMARY

Frontend Developer with 4+ years of experience building complex, high-load products in cross-functional teams at Yandex, Sber, and MTS Digital. Skilled in end-to-end development with React, TypeScript, and Next.js, with a strong focus on performance, architecture, and maintainable UI. Experienced feature lead and mentor.

TECHNICAL SKILLS

Frontend: TypeScript, JavaScript, React, Next.js, Redux, Zustand, Tailwind CSS, SCSS
Testing: Jest, React Testing Library (RTL), WebdriverIO
Backend: Node.js, Nest.js, Express, SQL
Tools & Other: Electron, Docker, Git, CI/CD

PROFESSIONAL EXPERIENCE

Yandex — Senior Frontend Developer *Apr 2024 – Present*

Yandex Messenger & Telemost — messaging and video-conferencing platform

- Played a key role in the largest initiative across the Yandex Messenger and Telemost services — merging them into a single unified product.
- Architected and implemented the unified Backend-for-Frontend (BFF) and SSR layer, defending the design through cross-team technical review.
- Delivered core features end-to-end: video/audio calls, chat-list multi-select and message range selection with bulk actions (mute, mark as read/unread, notification toggles) — driving MAU and paid-subscriber growth.
- Reduced desktop crashes by 20%, cut bundle size by 10%, and improved load speed by 10%; accelerated autotest execution by 20% by modernizing the test framework.
- Served as feature architect and technical lead; mentored and managed an intern.

Sber — Frontend Developer *Sep 2023 – Apr 2024*

GitVerse — Git-hosting platform

- Delivered full-cycle development: code review, diff visualization, inline comments, CI/CD pipelines, and a syntax-highlighting code editor.
- Launched the platform on schedule, reaching 3,000+ MAU and ranking #1 by repository count among Russian Git-hosting services within the first month.
- Designed and maintained a custom UI component library built on Radix UI.
- Initiated and shipped AI features, including AI-powered code explanation and an in-editor code chat.
- Mentored a junior developer.

MTS Digital — Frontend Developer *Apr 2022 – Sep 2023*

RDM — data self-service portal

- Built full-cycle features: an ER-diagram editor, tables with filtering/aggregation/sorting, and a data-flow visualization graph.
- Delivered the BigData center's first data-flow visualization, reducing dictionary creation time and cutting analyst workload across teams.
- Created a design system based on the MTS brand book on top of Ant Design.
- Contributed to backend development in Python and FastAPI.

EDUCATION

Bauman Moscow State Technical University *Sep 2017 – Jun 2021*
Bachelor's Degree — Autonomous Control Systems (Dept. SM5)

ADDITIONAL EXPERIENCE

Coding Skills — HTML & CSS Instructor *Sep 2021 – Sep 2023*

- Developed course materials, led live training sessions, and reviewed student assignments via chat channels.
